IMPROVE YOUR AIR: PAINTS, STAINS, & FINISHES

We are pleased to offer **Safecoat** and **Bioshield** Products. There are some products not listed, so call for details. **Safecoat** is designed for areas in which the health of the occupants is a concern: schools, hospitals, homes, offices - anywhere people want to reduce their exposure to toxic chemicals. Safecoat paints have almost no odor during application and are odor free once cured. They contain no formaldehyde, ammonia, crystalline silica, or ethylene glycol. **Bioshield Healthy Living Products** are derived from plants or minerals proven over centuries for their beauty and safety, like citrus peel extracts, essential oils, seed oils, tree resins, inert mineral fillers, tree and bee waxes and natural pigments. "A good first step to improve a home or office's indoor air quality is to remove products that negatively impact indoor air quality including carpets, fabrics, cleaning products and paint that have that 'chemical' smell. In other words, if it stinks, it stinks," Bioshield founder Rudolf Reitz. **Call us at 541-592-3828**

Zero VOC Paints

Choose from hundreds of Safecoat paint colors at <http://www.afmsafecoat.com/color.html>. Have your paint pre-tinted!
